COMMENTS/HISTORICAL INFORMATION:

This property is a two-story c. 1880-1900 frame "I" house with a three-bay façade and a standing-seam metal roof. The property rests on a foundation of unknown material – it is covered by a metal "skirt" which looks like rusticated block. The house has a two-story ell at the rear, and all of the windows are now 1/1 replacement vinyl sash. The house has modern shutters on three of the first floor windows. The building has little exterior ornamentation and is very simple in design. An entry porch appears to be a later addition – it has a concrete block base and six slender wooden posts supporting the shed-style standing-seam metal roof. Triangular braces are located between the posts. A large shed /one-car garage is located in the rear yard behind the house.
